*If your tattoo is not you anymore,
you can now change your life for
the better worry-free.*

*Maria Pratt has worked in my private
cosmetic practice as a clinic chief and
my personal assistant for the past 18
years. Her skill level and manual dexterity
were superior in the treatment of our
patients. Her honesty, integrity, and
judgment were of the highest caliber.”
Marvin C. Weinstat, DMD*

*"Maria's long career in the medical
profession has made her very skilled in
helping patients elect the best
procedures for their particular needs, and
then implementing them. She is extremely
detail-oriented and takes great pride in
her work. I have absolute faith in Maria's
professionalism and will continue to seek
her expertise when in need."
David Sutton, Attorney*

If your Tattoo is not You anymore

Don't worry, it can be removed using a new NON-LASER process that safely lightens or removes ALL colors, in up to 75% fewer visits than laser. With this innovative technique, you can avoid the pain and cost of laser removal, which often has very disappointing results.

Benefits of Saline Tattoo Removal over Laser

- All-natural, saline-based product, no harmful chemicals
- 50% - 75% fewer treatments than laser
- Much less discomfort than when your tattoo was put on
- So much less painful than laser treatment
- Less expensive and more convenient than laser
- Lightens or removes all colors whereas laser cannot.

(Laser cannot remove greens, some yellows and some blues. If white was added to a color to make pink, lavender, lime green, etc., the laser will turn the pigment gray or black. Our process will remove the gray, black or any other color that laser would leave behind.)

A Safe and Comfortable Process

Maria Pratt now offers a safer and more effective alternative to laser tattoo removal that is becoming popular across the US because it is so superior to laser. It's a proven, all-natural saline tattoo removal system medically-developed by Tattoo Vanish®.

Our process to remove tattoos, permanent makeup, and cosmetic tattoos is like the tattoo process you experienced when you got a tattoo in that it uses similar equipment and procedures (but with much less discomfort). However, instead of pushing ink into the skin, a special saline solution gently lifts the ink right out of the skin.

The saline tattoo removal process leaves the epidermis structurally sound, which enables the tissue to heal within six to eight weeks. The number of treatments varies by skin type and how deep the ink was applied.

Our office maintains the highest level of sterilization possible for all aspects of treatment. Maria Pratt has completed OSHA bloodborne pathogen training consistent with OSHA bloodborne pathogens standards.

For your comfort, we use a highly effective topical anesthetic before and during the procedure. The natural saline product is then applied on your tattooed area. Written care instructions are provided after your treatment.

Maria Pratt,
Certified
Tattoo
Removal
Technician

Maria is the only Certified Tattoo Removal Technician in Marin offering Saline Tattoo Removal using the medically-developed Tattoo Vanish® process.

Maria combines 25 years of professional medical experience in the Bay Area and a passion for helping others. She sees her natural tattoo removal service as much more than a business - it's a way to help people change their lives for the better.

"I am excited about being part of my clients' journeys forward; the elimination of tattoos using a safe and non-damaging process will enable them to be who they want to be, and lead fuller and more rewarding lives."
